Dee Baxter Drake Industries has been a global leader in innovation for over a century. What had started as a quest for more effective pharmaceuticals has grown to encompass nearly every scientific field imaginable. With facilities dedicated to such diverse subjects as DNA research, robotics, medicine, communications, travel, agriculture and mining, DBD Industries is working to bring the future ever closer to the present. Dee Baxter Drake is, at its heart, a company truly driven by purpose. We envision a brighter future, one free of such common afflictions as famine, age, disease and death. We imagine a world where travel is reduced from hours to minutes, where precious natural resources are pulled from the stars and man is free from the burden of physical labor. We believe mankind should no longer be subject to the whims of the universe, that humanity should take its rightful place as master of all it surveys. We are one of the world's largest employers in the scientific and engineering fields. DBD recruits the best and brightest from every continent to aid us in our effort to create a better world. Our research and development facilities are located in nearly every country and we work closely with both governments and private industry. Innovations originating within the walls of DBD have gone on to change the way you live. Much of the technology, products and food you enjoy have been perfected, in some way, by our scientists. No matter who you are, where you live or what you do, Dee Baxter Drake Industries is a part of your life.. But it was all a lie and a lie of this scale was going to cost....someone...
