Alternate cover for this ASIN can be found here Ivy had a poor but happy childhood in depression-era Ohio until the economy forced the family to move from her childhood home. Many years later she is married, happy, and prosperous. The only thing missing it seems is a little piece of the happiness she found in her childhood. Her husband wants to give her this dream. When a mysterious man comes to the door to deliver, she believes her life is finally fulfilled. But she finds her dream slowly becomes a nightmare as the new addition starts to slowly take over her life and threatens to take away everything she has. LeFevre's novella begs some questions. Can we get back our past, and if so, can we ever really be rid of it?
