'No one would have believed in the last years of the nineteenth century that this world was being watched keenly and closely by intelligences greater than man's...' A curiosity falls to Earth on Horsell Common, and a nightmare begins. England is laid waste by huge fighting machines, armed with devastating heat rays. Humanity brings its own weapons to bear upon the invaders, but can they be any match? Trapped in a war of two worlds, one couple battles to survive. Herbert and Amy bear witness to... The Martian Invasion of Earth.
