Provocative and Enlightening Book Dissects the Human Consciousness “The Far-Off Land” philosophically evaluates the hallucinogenic drug-experience and intends to collect the perspectives of philosophy for better understanding of the human consciousness, improve the cure to mental illness RIVERTON, Utah – (Release Date TBD) – A credible resource classifies hallucinogens as psychoactive drugs that could cause subjective changes in human perception, thought, emotion, and consciousness—inducing experiences qualitatively different from those of ordinary consciousness. To gain a deeper understanding about this perennially interesting subject, author Eugene Seach attempts to dissect the human consciousness to provoke and enlighten the readers’ mind in The Far-Off Land, a revealing book that presents a philosophical evaluation of the hallucinogenic drug-experience. This book is a cerebral piece of literature that attempts to discover the broader realities that lie behind psychogenic phenomena and seek a pattern that will explain the longing of human being for the Beyond, for the otherworldly substance of their intuition. Seach will take readers on a trip through millennia, offer them glimpses of the forthcoming and explore deeper his own psyche—and experiences with LSD and mescaline—in order for them to discover a more profound and broader understanding of the mind and human consciousness. Guided by a cardinal principle, Seach captures the philosophical prospects and covers a great background of other relevant fields of study that promote

psychotropic knowledge to better understand human consciousness— and to ultimately improve humanity's cure to mental illness and even solve life's mysteries. Filled with tremendous meaning and insight, revelations and wisdom, historical facts and quotes from the world's greatest minds and literature, *The Far-Off Land* is an intelligent and poetic prose that will inform readers about human consciousness and inspire them about life, including its complexities, a journey full of realizations and value. Stanley Krippner, PH.D. Co-author *DEMESTIFING SHAMANS AND THEIR WORLD* Now available An attempt at a philosophical evaluation of the hallucinogenic drug experience.
