Kate's sexiness can't be denied. Dressed in the skimpiest and hottest armored bikini costume ever made, she's an instant hit at the convention. And that's just the way Ryan likes it.

Watching men watching his wife has always intrigued him, but a slip of the tongue reveals his secret fantasy to his wife and opens up a whole new world of possibilities during their long weekend at the convention. Possibilities he never would have imagined before. Possibilities neither of them can resist. Fantasy is about to meet reality in a major way as the married couple explores the boundaries of their relationship and their vows to forsake all others.

Because they're not going to stay faithful by the time this long weekend is over, but does that really matter if they're being unfaithful together? Hot college studs, costumed babes, and sexy stars enter the steamy mix in an intense weekend of passion that will change their marriage forever! From Lexi Archer, author of your favorite stories about women who stray and the men who love them for it!
